

# Halve the climate footprint by changing your hazardous waste containers to **WoodSafe®**

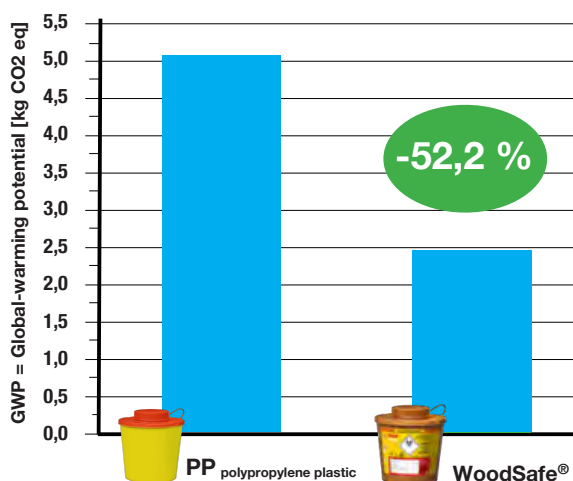

- WoodSafe® is a new innovative series of hazardous waste containers made of residuals (sawdust) from Swedish forests and recycled plastics that halves the CO<sub>2</sub> emissions.

- Based on biocomposite by Stora Enso.

LCA - WoodSafe® vs PP

## FrostPharma WoodSafe®

- Available in 0,5 litre, 2 litre and 3 litre
- Major environmental benefits – halving the CO<sub>2</sub> emissions
- Same function and flow as today – smooth change
- UN3291 and CE marked
- “Green-look” – eco-friendly appearance and design
- Unique product, easy to communicate and implement in your sustainability work both internally and externally
- Manufacturing in Sweden with only Swedish raw materials. Patent Pending (nr 2152368–4)
