Executed tests: Sharps injury protection – Requirements and test methods - Part 1: Single-use sharps container (ISO 23907-1:2019).

Test result: The test results show that the tested parts meet the requirements in standard ISO 23907-1:2019.

The Sharps Container is UN 3291 approved for the carriage of dangerous goods by road according to the latest ADR version. Certificate no C900879.

MÄLARPLAST AB

Tommy Eriksson
Controller, Quality & Environment

Mälarplast is a complete supplier of environmental and customer-adapted plastic technical solutions. We take overall responsibility from idea, construction and prototype to tool making and full-scale production of both small and large details, thermo- and thermosetting plastics. Mounted, printed, packed and ready! Through our know-how, broad and flexible machine park with our own tool department, delivery precision and broad network of talented partners, we provide our customers with a cost-optimal, sustainability-focused and reliable delivery. We are certified according to ISO 9001 (quality) and ISO 14001 (environment).
